

Stitching Instructions for the Habitat for Humanity Needlework Samplers

Getting Organized

In addition to these instructions, you will need a piece of ivory AIDA 14-count fabric size 12" x 18" as well as the following DMC Floss - 321 (dark red for first line of text and centers of hearts), 336 (dark blue for the three figures under roof), 498 (outside edges of hearts and legend and date below), 780 (dark gold for "Home Sweet Habitat"), 3347 (lime green for roof and side of house), and 3765 (medium blue for "Built with love for the").

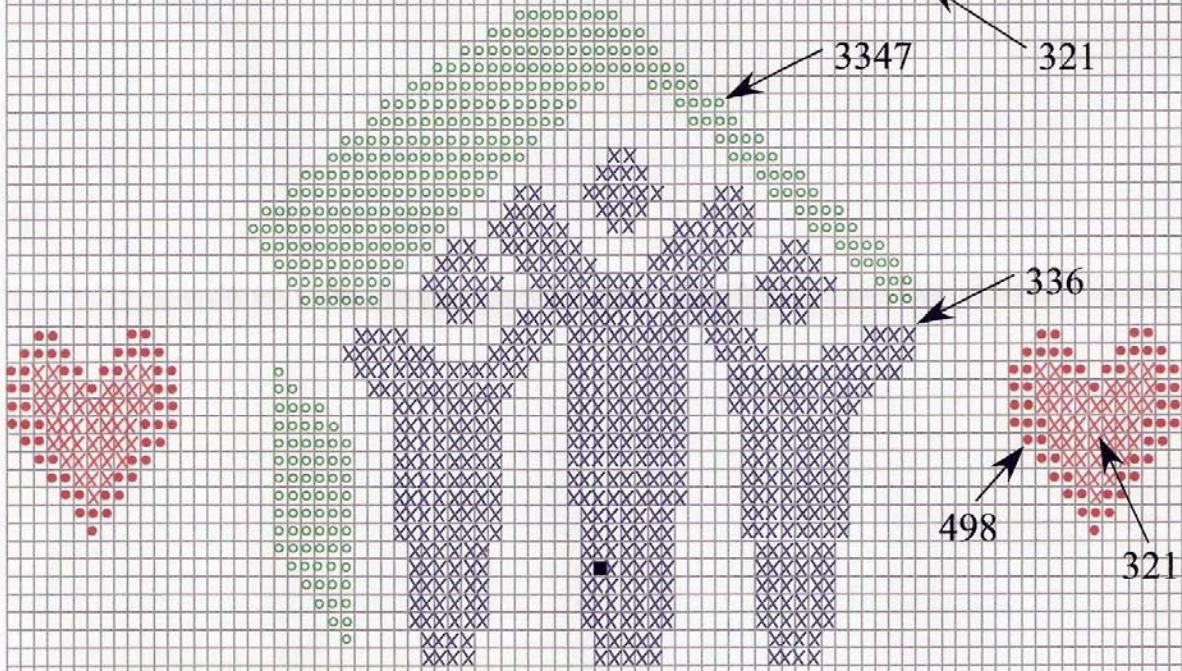

Preparing to Stitch

If you usually start from the center of a pattern and fabric, you would need to start at the ■ in the middle figure six lines from the bottom of the figure (DMC 336). I have color coded the chart so that you would not have to be flipping from page to chart for the color numbers, but please do not stitch the arrows or the DMC Floss numbers.

Stitching the Chart

Use two threads of DMC for ALL stitching even back stitching.
